

[PARTNER NAME] × RELAY

The human layer for AI-built software.

A live line to expert engineers — the moment your team hits
a wall.

THE PROBLEM

Your teams ship fast with AI — until they hit a wall.

AI gets you to a working prototype in days. But the last mile — the gnarly bug, the production outage, the launch hardening, the scaling question — still needs an expert human. That's where the hours, and the momentum, disappear.

Stuck mid-build

A bug the model can't crack.

Launch blockers

Domains, SSL, security, performance.

Production fires

It breaks at 6pm on a Friday.

THE SHIFT

AI writes the code. *Humans still ship it.*

THE OLD WAY

- Post a contract role, wait days.
- Re-explain your whole stack.
- Hope they've seen your tools before.

WITH RELAY

- Tap once — an engineer is live in under a minute.
- Matched to your exact stack.
- Already briefed by project memory.

WHAT IT IS

Expert engineers, on demand.

Relay connects your team to vetted engineers for real-time help — over chat, voice, and screen share.

Live, not async

Chat, voice, and screen share — solving it together in real time, not over a ticket queue.

Stack-fit

Matched to your tools and frameworks, so there's no ramp-up and no re-explaining.

Under a minute

An available engineer joins almost instantly — help arrives at the speed of the problem.

HOW IT WORKS

From stuck to shipping, in three steps.

1

Connect

Tap to get help. An engineer accepts and you're live — chat and call open in one shot.

2

Build together

Work the problem side by side over voice and screen share until it's actually solved.

3

Ship & maintain

Project memory keeps every session, file, and summary — so the next engineer arrives briefed.

WHY RELAY

What makes it work.

Speed

Help in under a minute — not days waiting on a contractor.

Stack-fit matching

Every engineer is matched to the tools you actually build with.

Project memory

Sessions, files, and summaries persist. New engineers join with full context.

Pay for what you use

Free to start, then by the minute. No seats, no lock-in.

FOR YOUR ORGANIZATION

Built for teams, not just seats.

Departments & admins

Structure access by team, with admins who manage their own people.

Usage visibility

See minutes and spend across the org, updated as sessions happen.

Wallet & recharge

Top up once; every team draws from it. Recent transactions kept on record.

Terms, accepted once

One org-wide agreement binds the company — no signature chasing.

PRICING

Simple, usage-based — and discounted for you.

First 10 min

Free

No card to try it. Your team gets unstuck before you spend a cent.

By the minute

No seats

Pay only for live help used. Buy minute bundles; recharge anytime.

[X]% off

Via [PARTNER NAME]

Your partner discount is applied automatically at checkout.

IN PRACTICE

A Friday-night save.

- **6:14pm** Checkout starts throwing 500s in production. Revenue is stopping.
- **6:15pm** Your team taps Connect. An engineer who's shipped on your exact stack is live, screen-sharing.
- **6:48pm** Fixed, deployed, and written into the project. Everyone makes dinner.

GETTING STARTED

Live in a day, not a quarter.

1

[PARTNER NAME] sets you up

We create your organization and apply your discount — nothing for you to configure.

2

Accept terms, once

Your admin signs off on behalf of the org; your teams inherit it automatically.

3

Start getting unblocked

Invite your people and tap Connect. Real help, the first time someone's stuck.
